 FAX: +420 542 212 518,
 E-MAIL: info@mt-legal.com
 WEBSITE: www.mt-legal.com

MAIN ACTIVITIES:

- we have experience in providing legal services in the area of defense and security. Due to our focus on law of public procurement we have provided legal services to both contracting authorities and suppliers;
- we also focus on the issue of cyber security, which, generally speaking, means the area of security in ICT/IT. We believe that with the development and growth of importance of communication technology, IT services outsourcing and cloud computing, it is necessary to ensure increased attention not only to systems, networks, software applications or intellectual property protection, but also to data and especially personal data protection. Therefore we also provide our clients with legal services focused on the above mentioned objectives. Our experience contains public tenders for network construction and upgrade, data warehouses, systems development or ICT infrastructure;
- we provide our services to clients throughout the Czech Republic via our offices in Prague, Brno and Ostrava;
- we are also capable, via our foreign partners, to provide legal services in other member states of the European Union or outside of it;
- we are a founding member of the Association for Public Procurement (APP), the Public Private Partnerships Association (PPPA), the Defence and Security Industry Association of the CR and a partner of the Czech Green Building Council (CGBC);
- in 2009, we were awarded the ISO 9001:2008 certificate for our quality management system by NQA, a prestigious certification provider, in respect of the Provision of Legal Services and Consulting in the Area of Public Investments and the Implementation of Procurement and Tender Proceedings, in 2009, we were awarded the ISO 9001:2008 certificate for our quality management system by NQA, a prestigious certification provider, in respect of the Provision of Legal Services and Consulting in the Area of Public Investments and the Implementation of Procurement and Tender Proceedings in 2010 and 2011, we were ranked among the top five law firms in the area of public procurement in the Czech Republic within the Law Firm of the Year survey

MAIN ACTIVITIES:

OMNIPOL is the internationally recognised trading company with 75 years of tradition in the foreign trade with defence and aerospace equipment. The main current activities are:

Military Deliveries for (export):

- Ground Forces and Security Equipment (Simulation System and Training Devices, CBRN Detection, Protection and Decontamination System, Special Purpose Vehicles and Engineering Equipment, Components and Spare Parts for Military Vehicles)
- Electronic Systems (Passive Surveillance and Monitoring (ELINT) Systems, Air Traffic Management and Airport Radar Systems, Electronic Area Control Systems, Traffic Monitoring Systems)
- Aerospace Equipment (Flight Simulators and Training Devices, Personal and Aircraft Braking Parachutes, Components and Spare Parts for Aircraft and Propulsion Units, Maintenance, Repairs, Overhauls)
- Related Services (After-sale Product Support, Repairs, Maintenance and Overhauls, Modernisation, Modifications and Improvements Packages, Training and Education)
- Import Capabilities (Civil and Military Aircraft and Helicopters, Weapon Systems for Air Forces and Air Defence, Sophisticated Electronic and Meteorological Systems, Financial Services)

Nonmilitary Deliveries for:

- Technological Supplies for Light and Heavy Industries (Food Processing Equipment, Metal Forming Machines and Machine Tools, Electrical Furnaces, Technologies for Production of Building Elements)
- Beverage Production Equipment (Machinery for Beer and Other Beverage Production, Bottling and Packing Lines, Malt and Machinery for Malt Production, Technological Assistance)
- Environmental Protection Equipment (Industrial Waste Water Treatment Plants, Household Waste Water Treatment Units, Mobile and Portable Water Purification Units, Ammunition Disposal and Demilitarisation)
- Technologies for Alternative Power Generation (Small Hydroelectric Powerplants, Biogas Application Technologies, Photovoltaic Systems, Turn-key Projects)

OPTAGLIO s.r.o.

ADDRESS: Technologický park Řež, Hlavní 326,
 250 68 Husinec – Řež
 PHONE: +420 220 941 075, FAX: +420 220 941 077
 E-MAIL: obchod@optaglio.cz
 WEBSITE: www.optaglio.cz

MAIN ACTIVITIES:

Optaglio, the world leader in electron beam lithography, focuses on the design, development and production of advanced optical security devices and holograms. Our unique technology, used in the production of holographic features and optical microstructures, is recognized worldwide as the most advanced technological standard.

Optaglio implements next generation technologies to protect the authenticity of government document such as IDs, passports, banknotes, visa, tax stamps or vignettes. Optaglio holograms also protect the good name of large global brands and safeguard the authenticity of their production. Special microscopic holographic particles OVDot® are used for covert asset marking and serve for example for reliable identification of weapons or explosives. Optaglio products can be found in more than 50 countries across five continents. Optaglio production runs a strictly controlled 24 hours security regime.

OPTOKON, a.s.

ADDRESS: Červený Kříž 250, 586 02 Jihlava
 PHONE: +420 564 040 111
 FAX: +420 564 040 134
 E-MAIL: optokon@optokon.cz
 WEBSITE: www.optokon.cz

MAIN ACTIVITIES:

FIBER OPTIC SOLUTIONS OPTOKON, a leading global designer and manufacturer of fiber optic network solutions specializes in the production of military tactical components for use in harsh environmental conditions. OPTOKON currently supplies the military forces of more than twelve countries with high quality military tactical components using unique Expanded Beam technology. Series components include:

- Expanded Beam and ferrule technology MIL-DTL-83526 optical connectors
- Hybrid Fiber & Copper connectors
- Tactical cable with optical fibers
- Ruggedized media converters
- Ruggedized field switches
- Light ruggedized field switches

Cable drums for various cable lengths, storage and handling
 These ruggedized optical components were designed and implemented for use in NATO armed forces in response to the demand for an interconnect system that can successfully group terminations in a harsh environment. The components have successfully passed military testing and supplier approval for both NATO and non NATO nations. These innovative devices are used for installation of mobile commands with field LANs to ensure data communications at remote observer stations, for LAN field installations in crisis situations and for installation headquarters for expeditionary troops. The devices fully comply with STANAG 4290 requirements and all military standards for components used in harsh environmental conditions. In addition to proving their unique and unassailable properties within European deployment, OPTOKON military tactical components have also demonstrated their full operational range in desert applications in the Middle East, in the Far East and within military applications and security systems in India, Vietnam and Japan. OPTOKON ruggedized fiber optic components can also be found fully deployed within heavy industry and petrochemical, mining and broadcasting optical networks.

 PHONE: +420 482 711 740
 FAX: +420 485 100 616
 E-MAIL: spm@novota-lib.cz
 WEBSITE: www.spm-liberec.com

MAIN ACTIVITIES:

S.P.M. Liberec s.r.o. is designing & developing, manufacturing and selling top quality sewn products for military, police security agencies and accessories for sports and leisure time. The main product line for military is Modular Load-Carrying System MNS-2000. It was developed for career soldiers of the Czech Armed Forces as a part of the „Field Equipment Concept“ project. The system is designed for all career soldiers from Land Forces, reconnaissance units, military police, and paratrooper units to special unit. It was successfully tested in combat conditions, e.g. in Bosnia, Kosovo, Macedonia, Kuwait and Afghanistan missions and at joint military field days with NATO armies (USA, GB, D). System's variability allows for individual parts adjustment according to the duty or assignment character. The system is made in one size, which fits all, thanks to the adjustable straps. It is compatible with equipment of allied NATO forces.

Saab Czech s.r.o.

ADDRESS: Sokolovská 79/192, 186 00 Prague 8
 PHONE: +420 234 703 811
 FAX: +420 234 703 822

 WEBSITE: www.saabczech.cz

MAIN ACTIVITIES:

Technology for a changing world - Saab offers world-leading systems, products and services that meet society's changing needs for defence and security. Saab's operations are focused on the three strategic business segments; Defence and Security Solutions, Systems and Products, and Aeronautics.

Defence and security solutions - Saab is a leader in advanced command and control and communication systems for military and civilian applications. The segment also comprises a wide range of integration services, integrated support and logistical solutions, and sophisticated consulting services.

Systems and products - Saab offers world-leading systems, products and components for defence, aviation, space and civil security. Also included in the segment are long-term maintenance and operational services for the systems it has delivered. Saab has a strong position in advanced training systems for land-based forces and now lists special police units among its customers. Saab Training Systems offer a complete training concept. A full spectrum system consisting of coherent products and services designed to prepare soldiers and officers for the challenge of today, bringing you the future in training. Aeronautics - Saab's extensive military and civilian aeronautics operations are dominated by the Gripen program but also include the unmanned aerial vehicles (UAV) of the future. In civilian operations, Saab is a supplier of structures and subsystems to the aircraft manufacturers Airbus and Boeing. Gripen, the world's most modern fighter aircraft in operational service, is currently used in Sweden and NATO members the Czech Republic and Hungary. As a supplier of subsystems, Saab utilizes its expertise to develop complex structural units and subsystems for commercial and military aircraft manufacturer.
